ABSTRACT OF THE DISCLOSURE

A software program enables to maintain the amount of task by the operator for image processing regardless of the number of image pages. By displaying the combined overlapped image, the operator is able to visually confirm a processing area or range for a predetermined image processing. Because of the above described features, the operator is able to easily specify the tasks such as removing , moving and inserting an image in the selected area in an assured manner without significant experience or knowledge of computer programs.
